

# Gold Chip Data

*The Solution to IT is Right Here*

**At Gold Chip Data, we provide secure data destruction, installation, and relocation services, ensuring the safe, efficient handling of sensitive IT infrastructure while protecting assets and optimizing operations.**

## About Us

With over 30 years of global expertise, Gold Chip Data delivers innovative, reliable, and environmentally responsible IT solutions—ranging from secure data destruction to advanced data center installations—empowering businesses with seamless, cutting-edge infrastructure services.

## Why Choose Us

- **Premier Expertise:** Our team of highly trained professionals ensures top-tier data security and IT management.
- **Tailored Solutions:** We customize every service to fit your specific project needs.
- **Innovative Technology:** Leveraging the latest tools and methodologies to optimize performance and security.
- **Dependable & Secure:** Providing accurate, eco-friendly, and compliant solutions.
- **Ongoing Support:** We're with you every step of the way to ensure a hassle-free experience.

Expertise in managing Original Equipment Manufacturer (OEM) services, including asset tracking, logistics, and end-of-life solutions.

Ensuring compliance with the highest standards for sustainable and responsible recycling.

## Our Services

### Full Service Decommissioning

Complete decommissioning and responsible recycling of individual racks, full rows, or entire data centers.

### Data Center Relocation

We manage the entire data center move, from detailed planning to reinstallation.

### New & Full Rack Installations

Expert setup and installation of full racks, customized to your project's specifications.

### Network Cabling & De-Cabling

Professional network cabling and de-cabling services tailored to your infrastructure needs.

### Immersion & Liquid Cooling

Installation of advanced immersion cooling systems for enhanced server efficiency.

## Our Services cont.

### Device, Cable & Rack Recycling

Responsible recycling of IT equipment, focusing on eco-friendly disposal solutions.

### E-Waste Disposal

Secure and responsible e-waste disposal for outdated or excess electronic equipment.

### Data Eradication

Certified data-wiping services to permanently remove sensitive information from hard drives.

### Data Destruction

On-site and mobile data destruction services to safely eliminate confidential information.

### Office Clean-Outs

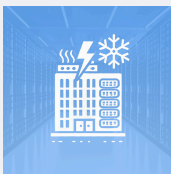

Eco-conscious office clean-outs for IT and hardware disposal.

### Secure Transportation

GPS-tracked armored transport with armed security for high-value IT assets and data.

## NEW Pre-Installation Engineering & Optimization Services

### Facility Capacity Analysis

Our expert assessments help maximize infrastructure utilization, supporting high-density systems and future expansion.

### Facility Energy Optimization

Our solutions reduce energy consumption through advanced cooling strategies, equipment right-sizing, and industry best practices.

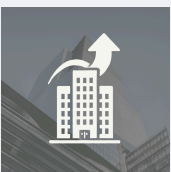

### Facility Resiliency Analysis

Our assessments provide insights to strengthen infrastructure and support Tier certification requirements.

### Facility Reorganization

Our services help maintain proper cooling and electrical efficiency as equipment is relocated or upgraded.

### Facility Capacity Expansion

Our expert team helps increase infrastructure scalability while meeting Tier level requirements.

### Data Center Tier Level Assessment

From initial evaluations to certification support, we guide facility owners through the process of meeting industry standards.
